**PRIZES: The board decided to give points for prizes to save on the money for the sleeve of balls that were not being used.**

**How to determine how many players get prizes? It is 1/3 of the field. Therefore, if 60 people play, then 20 people get prizes. (5 teams and places)  
People will call looking for a team. Make every effort to find a team for the player and at times you may need to make teams.**

**If there are 3 man teams at the last minute ask the pro the best way to handle this. Ask someone to keep their score and they would be the blind.**

**Today's field is 72. If there are ties, everyone gets the same number of points for that place. There will be less net prize positions to give out.**
